ST620 Ultra

4K@60fps Al Auto Tracking PTZ Camera

FULL Dante POE; MULTIPLE ST INTERFACES

Stapes ST620 Ultra is a professional 4K@60fps PTZ camera featuring a 1/1.8 inch 8.29MP CMOS sensor that captures ultra-sharp UHD video with vibrant colors, enhanced low-light capability, and wide dynamic range (WDR). Its 20x optical zoom with 16x digital extension provides seamless framing flexibility, while the 66.6° wide field of view accommodates large spaces. With Al-powered humanoid tracking, PoE support and FULL NDI&Dante AV-H compatibility, ST620 Ultra enables high-quality, low-latency IP video transmission over networks-perfect for professional live production, broadcasting, video production and AV applications.

4K Ultra HD@60fps

Stapes ST620 Ultra delivers stunning 4K UHD resolution (3840×2160) at 60fps, ensuring exceptional clarity, fluid motion, and professional-grade color accuracy. With WDR, HDR (High Dynamic Range) support, low-latency streaming, and future-proof performance, it meets the demands of high-end video applications.

36x Hybrid Zoom System [20x Optical + 16x Digital]

ST620 Ultra combines a 20x optical zoom delivering lossless close-ups with precise focus control and a 16x digital zoom featuring 4K-optimized processing. This hybrid system maintains optical clarity while extending zoom range, enabling smooth transitions from wide shots to tight framing with consistent image quality.

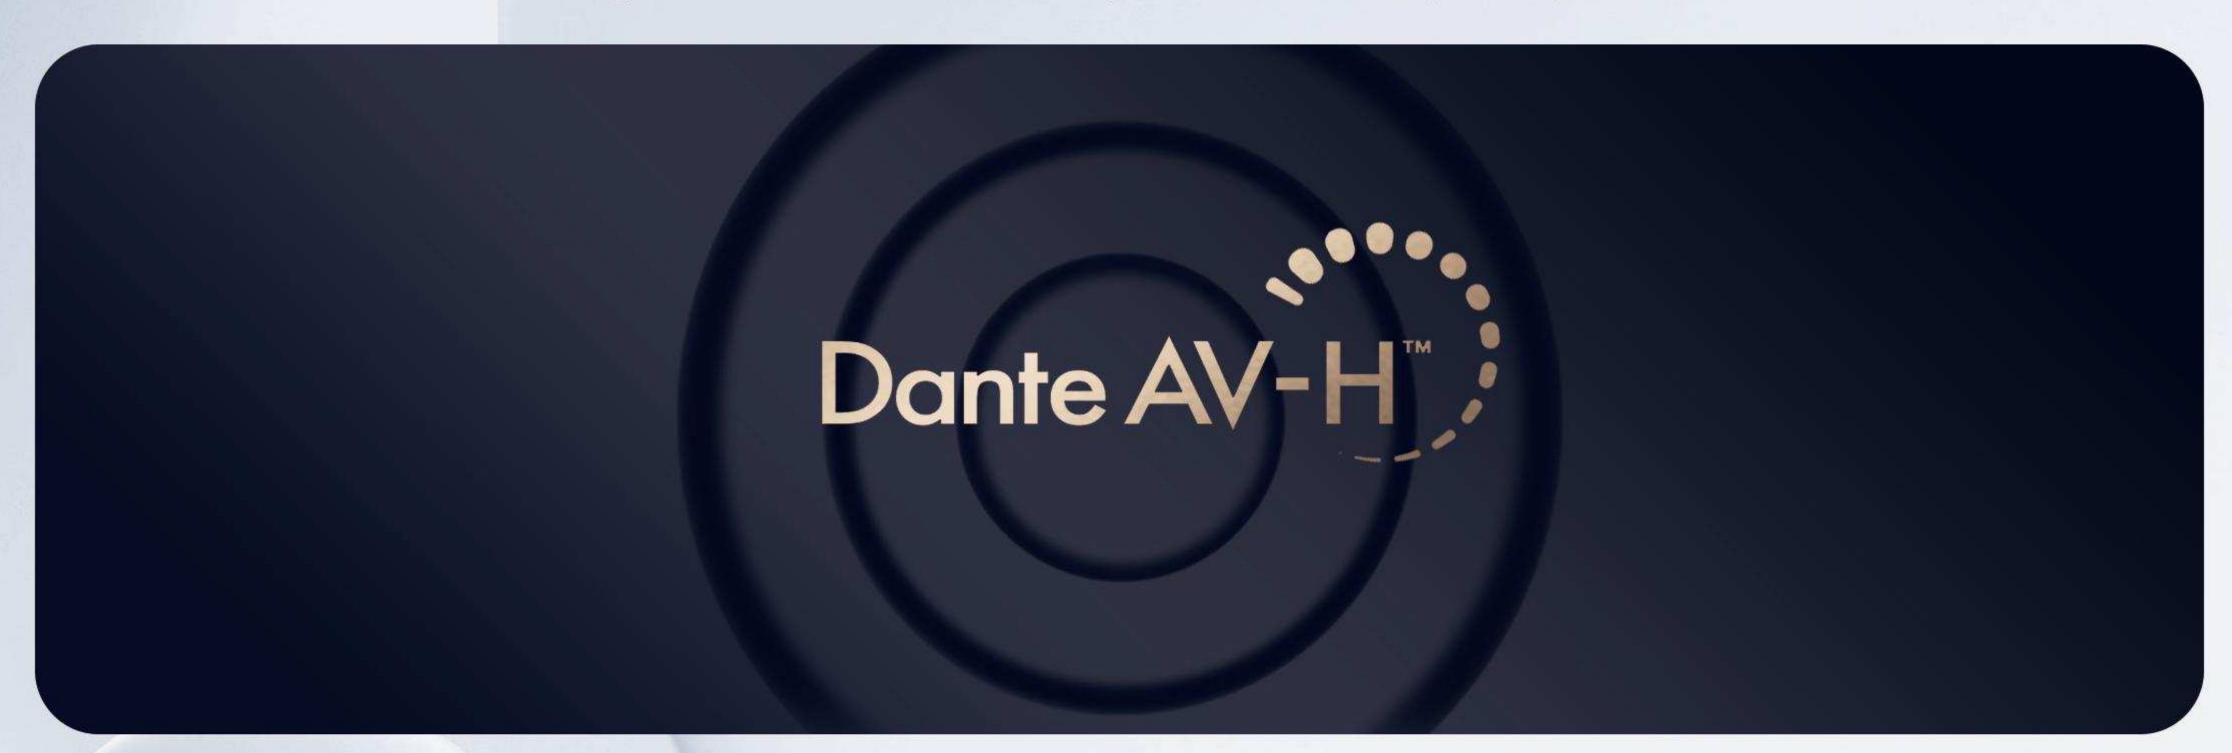

Multi-Interface Support [USB+HDMI+SDI+LAN] with Full NDI® and PoE - Ultimate Connectivity Flexibility

Stapes ST620 Ultra delivers professional-grade connectivity through its comprehensive interface options, featuring simultaneous USB 3.0, 3G-SDI, HDMI 2.0, and LAN ports with Power over Ethernet (PoE). The built-in Full NDI® support enables high-quality, low-latency IP video transmission.

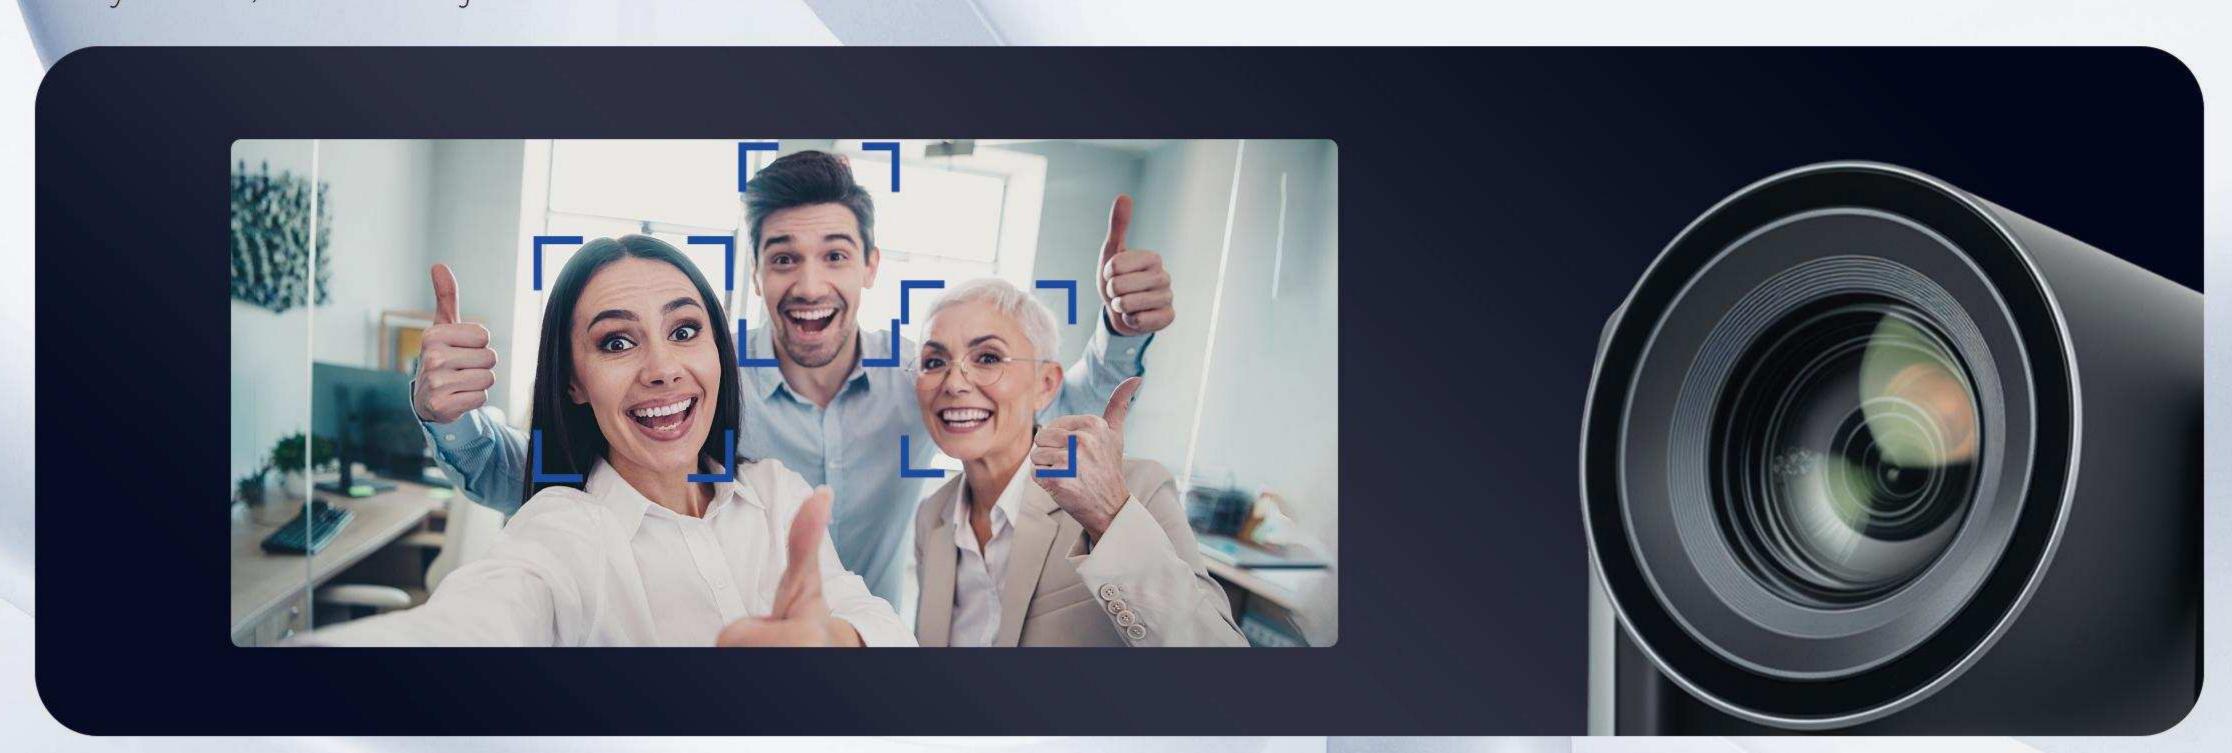

Dante AV-H Video Streaming

ST620 Ultra delivers ultra-low latency (<500µs), broadcast-quality video over IP using Dante AV-H's standards-based SMPTE ST 2110 technology. With full compatibility across the Dante ecosystem—including Dante Controller for real-time routing, Dante Domain Manager for secure enterprise deployment, and Dante Director for centralized management—the camera integrates seamlessly into professional IP media workflows.

Al Auto Framing and Tracking — Intelligent Subject Detection

Stapes ST620 Ultra employs advanced deep learning algorithms with humanoid detection to deliver professional-grade tracking performance. Its Al processor enables precision framing through automatic composition adjustment based on subject position and quantity, while adaptive tracking ensures smooth pursuit of moving subjects with intelligent speed prediction. Featuring scene awareness for automatic obstruction avoidance, this intelligent tracking solution maintains consistent focus and optimal framing even in dynamic, multi-subject environments.

Universal Compatibility and Software Support

Engineered for seamless plug-and-play integration, ST620 Ultra delivers native compatibility with all major platforms including OBS, vMix, Zoom, and Teams, while supporting industry protocols like VISCA over IP, ONVIF, and RTSP. Its driver-free USB 2.0 connectivity ensures instant recognition across Windows, macOS, and Linux systems, making it ideal for hybrid workflows in live production, unified communications, and AV control environments.
